I was reading on another atv forum with a guy that had a 440 big bore and he sayed a manual cam chain tensioner is a must for a built 400 cause a stock cam chain tensioner can fail and mess us the motor is this true resulting in damage valves or worst is this true and do recommend me getting one before I put my bb kit on?

**Manual cam chain tensioner [Archive] - ATV Riders Forum**

When you feel the engine tensioner parts (guide, rollers, etc.) make contact with the moving cam chain, back the tensioner bolt out 1/4 turn and tighten the jam nut. (For the finer pitch thread on the APE Pro Series tensioner it is advised to back the tensioner up 1/2 of a turn.)

Manual tensioners are by far a better way to go. Once set, they almost never need adjusting. OEM 'automatic' ones tend to over tighten the chain, causing it to wear out prematurely and are the cause of many 45 'skipping a tooth' on a cam and bending a valve. The issue with a manual one, is people do not understand how to adjust them. Simply to do really.

**Manual Vs. Mechanical Cam Chain Tensioner - General Dirt ...**

This manual cam chain tensioner is designed to replace the automatic and hydraulic tensioners on high performance engines. The automatic adjusters can back out when the throttle is closed suddenly at high RPM. This allows the cams to go momentarily out of time, and can result in bent valves and/or serious engine damage.
