### Fabozzi, Bond Markets, Analysis, and Strategies, 9th ...

Assuming that the credit quality of the issuer is unchanged, the price change on any bond can be decomposed into a portion attributable to a change in the required yield and a portion attributable to the time path of the bond. The price of a floating-rate bond will trade close to par value if the spread required by the market does not change and there are no restrictions on the coupon rate. The price of an inverse floater depends on the price of the collateral from which it is created and ...
