This ProE surface modeling tutorial will discuss the different surface modeling editing options and their usage for creating ProE surface modeling. The quality of the Pro Engineer surface modeling depends upon the levels of surface details captured in the ProE surface model.

ProE Surface Modeling Tutorial: Learn the Edit Options of ...

Pro Engineer is a versatile 3D CAD modeling tool. Like casting design, sheet metal design and FEA, ProE is used widely for surface modeling. The boundary blend is a Pro Engineer surface modeling command used mainly for creating smooth but irregular surfaces, where you know the surrounding 2D or 3D boundary curves of it. Let's say you need to create a piece of ProE surface just like the one shown in the above picture, then boundary blend will be the perfect surface modeling option for you.

Pro/ENGINEER Surface Modeling. Surface modeling skills allow the designer to move beyond the basic shapes that are used in solid modelers. By understanding the theory of how light reflects off of surfaces and how the human eye perceives this reflected light an experienced surface modeler can turn a clunky design into a freeflowing organic shape that catches the eye of the customer and stands out against the competition.
